## Day - 17

### Fintech Hackathon

**Date :** 17/07/2025

**Duration :** 24 Hours

---

### Challenge Brief

Every time there's a college fest or a student-led event, managing money becomes a headache. Students often pay from their own pockets for decorations, printing, and logistics – and things get messy:

- No proper record of who spent what
- Missing or incomplete receipts
- Reimbursements are delayed or not processed at all
- No clear view of how much of the budget has been used or wasted

This leads to confusion, stress, and even trust issues within teams and clubs.

Your challenge is to build a simple digital solution that makes expense tracking and reimbursements smoother for student event organizers.

---

## Objective

Design and develop a mobile or web application that:

- Lets users **record and track expenses easily**
  - Allows uploading of receipts or proofs of spending
  - Shows **real-time budget usage** for event organizers
  - Simplifies the reimbursement workflow for students and finance teams
- 

## General Guidelines

You can use any tech stack of your choice (web, mobile, or hybrid app).

The solution should focus on **ease of use** and **practicality** for student organizers.

Bonus points for features like:

- Notifications for approvals/rejections
- Role-based access (students, organizers, treasurers)
- UPI/payment gateway integration (mock or sandbox API)

You may work individually or in teams.

---

## Deliverables

A link to your GitHub repository with all source code.

A short video (max 5 minutes) explaining your solution and showing a walkthrough of the working prototype.

## Evaluation Criteria

<u>Criteria</u>	<u>Weightage</u>
Problem-solution fit	30%
User experience & UI design	20%
Technical implementation	20%
Innovation (bonus features)	10%
Demo and presentation	20%

## Addition resources or dataset

-> No specific dataset is required, participants can create sample data for testing.
